- ACCUMULATED SPLIT CHRONOGRAPH
- 1ST AND 2ND PLACE FINISH TIMES
- "TIME-OUT" FEATURE

OPERATING INSTRUCTIONS

THE S60 IS A MULTI-MODE STOPWATCH FEATURING user selectable interval lap chronograph (lap) and accumulated split chronograph (split) functions. You can time events in either mode up to ten (10) hours with 1/100 second accuracy. Precise timing is presented in hours, minutes, seconds and 1/100 seconds.

Before operating the timer, the display should show all zeros. If timer is not running, press (B) until all zeros appear. If timer is running, set the timer to zero by pressing (A), then press (B) until all zeros appear.

Select either the chronograph lap or the chronograph split mode by pressing (C). Either mode selected will be indicated on the display below the digits.

The lap chronograph records and displays individual interval times.

In the split chronograph mode, the timer records and displays the accumulated split times from start to event completion.

TO OPERATE: Start timing by pressing (A). Press (B) to record lap or split times. Press (B) again to return to running time. Press (A) to stop timing (last lap or split time will appear). Then, press (B) to reset to all zeros or press (A) to restart timing.

OTHER FEATURES: 1) 1st/2nd Place Finish - Using the split time mode, record first place finish by pressing (B), then press (A) to record second place. Press (B) to display second place time. Then press (B) again to zeroize. 2) Mode Switching - You may select between lap and split time functions by pressing (C) while the timer is running.
